## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,3-4, 8-9, 11-13, drawn to a bioactive MF3 polypeptide or a functional derivative thereof, a method of using said polypeptide, and a composition comprising said polypeptide.

Group II, claim(s) 2, 5-7, and 14-15, drawn to an isolated DNA, a vector and cell/plant comprising said DNA.

Group III, claim(s) 10, drawn to a method of isolating and purifying an MF3 polypeptide from bacterial cells.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the bioactive polypeptide derivative or functional fragment of claim 1 and a method of using it to protect plants are taught in the prior art as evidenced by Djavakhia et al (US 6,528,480 B1, cited in the International search Report). Djavakhia et al teach an isolated polypeptide from bacteria that protects plants from against pathogen infections, said polypeptide is considered an active or functional fragment of Applicant's SEQ ID NO: 1 (see the whole document). Therefore, there is no special technical feature that links the polypeptide of Group I to the DNA of Group II or to the method of isolating a polypeptide of Group III.

Furthermore, the special technical features of Group I that are not recited in any of the other groups are considered to be a bioactive polypeptide and a method of using said polypeptide with carrier molecules.

The special technical features of Group II that are not recited in any of the other groups are considered to be an isolated DNA, a vector and transgenic plant/cell.

The special technical of Group III that are not recited in any of the other groups are considered to be cultivating a microbial strain, fractioning and gel electrophoresis steps.

Therefore, for the all the reasons above, inventions I-III lack unity.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
